

POWERCHURCH PLUS

PowerChurch Plus helps you organize Membership, Contributions, Accounting and general Record Keeping, with **one complete package-at one incredibly low price!**

PowerChurch Plus is powerful enough to keep track of all the details of a church, yet **easy enough for everyone to use.**

With just a few clicks, you can access information about your members, their donations, or your church's financial status.

With over 20 years specializing in church management software, we are committed to one thing and one thing only - providing you with the tools to manage your ministry as efficiently as possible. We have designed PowerChurch Plus to be easy to use by busy church administrators like you, **regardless of previous computer experience.**

Over 21,000 churches have found that PowerChurch Plus is truly **"Church Management Made Easy."** We have built a large family of satisfied users by listening to people just like you. We value feedback very highly and use your suggestions to constantly improve PowerChurch Plus and our services.

Church Management Made Easy

How PowerChurch Plus Can Help You

PowerChurch Plus helps you streamline your administrative tasks and manage your information. Here's how it can help you keep track of the wealth of information your church needs to maintain:

Use One Program to Manage All Your Information

PowerChurch Plus includes four main application areas: Membership, Contributions, Accounting, and Record Keeping - organized according to your church administration tasks.

Keep Data Entry to a Minimum

Enter a piece of information once and PowerChurch Plus shares it with other modules. For example, enter a member's address in the Family Mailing List and PowerChurch Plus shares it with Visitations and Contributions.

Streamline Your Accounting Tasks

The accounting system is a full non-profit fund accounting system, which means that you don't have to try to bend a business general ledger package to track your different funds. And it is specifically designed for church use! An easy to use assistant helps you set your accounting records up correctly the first time. Other assistants make it easy to track donor restricted giving. PowerChurch Plus also accommodates church payroll requirements, such as social security exemptions and pastors' tax-free allowances.

View Member Photographs

Include pictures of individuals and families so you can see their faces when you view their records. You can also print pictorial directories so new staff members can quickly associate names with faces.

Customize for Canadian Use

PowerChurch Plus has the capability to print Canadian tax receipts, track reclaimable GST, and use Canadian specific terminology such as province and postal code.

Feel Confident With Built-in Security

For confidentiality, a full security system lets a System Administrator control each user's access to the various modules of PowerChurch Plus.

Increase Your Administrative Efficiency

All of your church's information is available at your fingertips. Keeping records up-to-date is a snap. You can enter and maintain information about families and individual members on a single screen.

Improve Your Outreach

Besides maintaining complete information about your church members, you can also record attendance at church activities and track other ministry services such as visitations, baptisms, weddings and funerals.

Work Smarter by Using E-mail to its Full Potential

PowerChurch Plus has advanced features to let you compose HTML formatted e-mail messages, attach files, and request read receipts on the messages you send. Save preparation time and postage costs by e-mailing your contribution statements. You can also send reports to a person or a group right from PowerChurch Plus. For example, e-mail the Balance Sheet report to the finance committee members so they'll be ready for the next meeting.

See the Big Picture

Display your data in a pie chart or bar graph to identify trends and analyze information. Print over 160 standard reports or design your own reports using our custom report writer.

Network-Ready to Grow With Your Needs

PowerChurch Plus comes complete with full multi-user network access at no extra cost. So, if your church has two or more computers connected by a network, any user on the network can enter data into PowerChurch Plus.

Membership

The Membership modules record information about every person in your congregation so you can serve them better. Find out who has a birthday or anniversary approaching. Notice when someone has not attended in a while so follow-up can be made. Keep track of when people served on committees, the results of outreach visitations, and when special ministry events like weddings, funerals and baptisms were performed.

Family Mailing List

Record the addresses, phone numbers, and other information about the families who attend your church. You can then print this information on reports, mailing labels, Rolodex or note cards. You can even include a photograph.

Personal Profiles

Keep up-to-date information about individual members and visitors in personal profiles. A profile can include a person's name, photograph, birthday, e-mail address, and a personal status description such as member, visitor or friend of the congregation. Use the customizable code fields to keep track of information that's important to your church, such as how someone joined, who has keys to the building, occupation, which school they attend, etc.

Activities and Skills

Record activities within the church such as youth groups and choirs. Also enter skills that the church needs, such as musical ability or carpentry. Then you can identify members with particular abilities as possible recruits for projects. You can also use this module to track church office holders like trustees or board members.

Attendance

Track attendance at church services, Sunday School classes, committee meetings, and other church activities. To make data entry easy, you can even use a barcode scanner to record attendance. You can also print reports and graphs to analyze attendance at church functions.

Visitations

Record information about visits made by church representatives to members and prospective members. You can also send follow-up mailings to the people who received a visit.

Ministry Services

Track baptisms, marriages, funerals, and other kinds of ministry services. Produce related reports, such as a report to show the number of baptisms performed over the last year.

Accounting

The Accounting system is not just for non-profit fund accounting use - it is specially designed for churches. An easy to use setup assistant walks you through the process of creating your chart of accounts and establishing beginning balances. The accounting section also includes accounts payable, accounts receivable and payroll modules.

Fund Accounting

Set up and maintain a chart of accounts and produce a full range of accounting statements including Balance Sheets, Income and Expense Statements, and Budget reports. Easily reconcile accounts with your bank. Assistants help you keep track of donor restricted giving according to FASB 117 guidelines. Track multiple equity accounts within each accounting fund. Maintain budgets for any account. Memorize recurring journal entries such as bank fees or depreciation transactions. Accounting history can be kept for an unlimited number of years.

Accounts Payable

Record invoices, print checks and 1099s, store vendor payment histories, enter hand written checks, and track reclaimable expenses, such as sales tax or Canadian GST. Manage recurring payments such as leases, insurance, mortgages, and utility bills.

Accounts Receivable

Produce invoices and statements for income other than contributions, such as room rental, tuition, and seminar fees.

Payroll

Easily accommodate church-specific payroll requirements, such as social security exemptions and pastors' tax-free allowances. Automatically calculate taxes using tables you can modify yourself. Print payroll checks, calculate hourly payroll, and print year end W2s.

Record Keeping

Equipment Inventory

Compile information on your church's assets, such as office equipment and musical instruments. Record serial numbers, costs, location, value, and other related information for bookkeeping, accounting and administration.

Music Library

Organize your church's music so you can retrieve it easily. Maintain information on titles, composers, media, and storage reference numbers. You can also create reports that list works by a particular composer, for example.

Education Library

Track all the titles in your library, print card catalogs and other various reports. For instance, you can print a late borrower's report or list the titles in your library according to scriptural reference.

Sermon Filer

Maintain a library of past sermons and the pastors who delivered them. You can record titles, scriptural references, and the location of sermon notes.

Contributions

Use the Contributions system to record weekly, monthly, and yearly donations. Protect contributor's privacy by not allowing counting teams access to sensitive contribution history. Also works with a MICR check reader to make data entry easier and more accurate. Track pledges or faith promises and print contributors' statements at any time, including Canadian tax receipts. Save postage and preparation time by sending statements via e-mail. Produce various income reports and graphs and automatically update the Fund Accounting module.

System Requirements

Minimum System Requirements:

- A Pentium class system, operating at 350 MHz or faster
- At least 120 MB of available hard disk space
- At least 64 MB of RAM (128 Recommended)
- Windows 98/Me/2000/XP
- A CD-ROM drive

Support

PowerChurch Software offers support to registered users who have purchased directly from the company or through an authorized reseller. If you should ever need to call for technical help, you'll be pleasantly surprised at how knowledgeable the technical support people are. As a new purchaser of PowerChurch Plus, you'll receive 90 days of toll-free technical support, starting with the date of your first support call. After your initial 90 days of support, you can choose from a variety of economical support plans offered by PowerChurch Software.
